To suit the territorial republican gold platform no better goldbug representative than A. J. Doran could be for the single standard however not candidate for delegate in the history of Arizona.

Here is what Peter Cooper, who died worth many millions, said of a newspaper: "In all the towns where a newspaper is published every man should advertise in it, if nothing more than a card stating his name and the business he is in. It does not only pay the advertiser, but it lets people at a distance know the town in which you reside is a prosperous community of business men. As the seed is sown so the seed recompenses."

It has been discovered that out in Wisconsin a marriage ceremony performed in a play is just as binding as if performed by a minister in a church. If a man and woman acknowledge shemselves to be man and wife before competent witnesses that settles it, according to law, and, therefore, if two players during a performance refer to each other as hu-band and wife, they are legally married-unless business is bad and there is no one in the audi-

There is proof conclusive that the distress in American factories is not caused by increased purchasesof foreign ed purchases by the American people. With gold standard prices for his products, the farmer must buy manufactures in decreasing quantity. When he buys less the country dealer orders less from the wholesaler, the wholesaler buys less from the manufacturer, the manufacturer makes less, and the factories must be closed to run on short time, And closed factories and half time means distress for the workingmen in the factories, and falling wages,-Spokesman-Review.

At last the ice is broken: Editor Upton of the Democrat has announced himtelf as a candidate for Probate Judge. In his own announcement he states that he does not seek the office for selfish purposes and does not hanker much after homors. Why not offer to do the work for nothing. A measly \$1000 to \$1200 per year is nothing when compared with the princely income of a country editor. Notwithstanding Editor Upton is popular and favorably known and if nominated will make a gallant run. He is a silver man to the core and is admired for his adhesion to those prin- contrary to all rule and precedent, ciples. The first announcement having been made, we confidently expect the intruders. While the coreper's jury was investigating the case of young Reynolds, who suicided a day of two since, the report was received that the body of another dead man had just been found on the hill above. The jury arose as one man and accompanied by the coroner, preceded to the place where the dead man lay, There he was, stark and cold, to all appearances, not a muscle moved and only the breezes fanned his raven locks into motion. The coroner and his jury drew near and b gan to circle around the remains for the purpose of investigation, when the dead man, opened his eyes and began to survey

ARIZONA PATRIOTISM.

All Should Stand by the Silver Cause.

The Gazette says, any man living in Arizona should favor the free coinage of silver and gold at the legal ratio of 16 to 1, simply from instinct, if he has not the ability to further reason. When it comes to legical argument. none can be found in favor of the single standard because it favors the inequality and enhances the value of money to the direct detriment of all producers. Even the hobby of protection vanishes because free coinage furnishes a natural protection according to the laws of trade and exchange, extending our fi-ld of commerce to all silver using nations and excluding importation from gold standard coun tries.

This is a natural law of protection, based on equity, not on the plan of putting the laborers earnings into the pockets of the trusts and combines.

What is true locally will hold true nationally, and who diputes the fact that free coinage would benefit our territory? The mountain sides in every section of Arizons are filled with silver deposits. Tombatone, once the pride of the mining world and the largest city in Arizona, is now but a little torn. The smoke stacks from the many big silver mines are now silent and millions of taxable wealth has been swept away in the county of Cochise alone. In the White Hills Mohave and in Yavapai county similar losses have been sustained and once thrifty camps are now desolate. In the face of all this, right here in our own county men declare for the gold standard. They should not have disgraced their homes by so doing.

# Eczema All Her Life.

Here is another case showing that there are few remedies which cure deep-scated blood diseases. Eczema is one of the most obstinate blood troubles. S. S. S. wipes out completely this disease, as well as all other evidences of impure blood whether obstinate or mild. There are few men better known all over beKalb county than Mr. E. D. jenkins who resides at Lithonia Georgia. He is the owner of a quarry of the celebrated Lithonia granite, which is so extensively used in several States, and is acknowledged to have no superior as a paving stone. His family has lived in DeKalb for forty years and everybody knowr.

"Ever since she was a year old," has said, in a recent interview, "my daughter, Ida, has suffered from Eczema, and I have never heard of a worse case of this dreadful disease. For thir

teen years she has been badly broken out all over her body, causing her untold suffering, and frequently readering her unable to attend school. Her arms and limbs would crack open and bleed, then dry up and scale off by the handful, and at one time an awful sore appeared on her ear, which became severely inflamed and almost dropped off. The disease also broke out on her head and her hair was a continuous mass of scales. Her condition was truly pitisble.

"Of course we have done all we could

"Of course we have done all we could to relieve her, and have given her almost every known treatment. She has taken potash mixtures and various salves and external applications by the wholesale, and almost every so-called blood remedy, all without the slightest benefit, and year by year we could not feel the slightest encouragement that she would ever be well. I was advised several times to send her to Hot Springs, and also to a celebrated spring in Michigan, and was told that this was the only chance on earth of her ever being cared, as the disease was too aggravated to be checked by medicines.

"A few months ago, someone recommended S. S. S., and as soon as her system had taken on the effects of this medicine, an improvement was noticed. She grew better all the while and continued to improve in every way. We were delighted to see her so much better and for the first time felt that ahs would get well. The medicine was continued a while longer, and now she is cured sound and well, her skin is clear and pure, and she has been saved from what threatened to blight her life forever. The cure is all the more remarkable because she inherited the disease, which has been in our family for several generations, and I am happy to find able because she inherited the disease, which has been in our family for several generations, and I am happy to find in S. S. S. a cure for a diseas which all the specialists in the world fail to cure. I consider S. S. S. a most wonderful remedy, and it certainly has no equal for deep-seated blood diseases which all other remedies do not seem to touch." This experience is like that of all others who seek relief from the many so-called blood purifiers, only to be discouraged. It is but folly to expect a cure from this dreadful disease by the use of salves, lotions, or any external application.

lotions, or any external application.

The disease is in the blood, and only a blood remedy can eliminate it.

S. S. S. is a real blood remedy, guaranteed purely vegetable, and for real deepseated blood diseases, has no equal. It cures permanently Scrofula, Tetter, Rheumatism, and all of the many blood ses. It has m markable cures of Cancer, full accounts of which can be had on application; our valuable books on blood and skin diseases will also be sent free to any address. Swift Specific Company, Atla
